Re: Failure to Comply with Permit Condition
Permit No.: 06S1261P6078
Well No.: b(6) A-1
Location: SE/4, Sec. 3, T 25N, R 4E
Osage County, Oklahoma

Dear Ms. Dollar:

Condition I.B.2. of the referenced permit limits injection pressure at the well head to 0 psig. The annual report dated July 17, 2007, shows injection pressure in November 2006 to be 30 psig. Therefore, you were noncompliant with that permit condition.

Osage Underground Injection Control regulations and the referenced permit require you to continuously comply with all permit conditions. Please assure that injection pressure at the referenced well is continuously less than 0 psig.

Osage Underground Injection Control regulations and the referenced permit require you to continuously comply with all permit conditions. The Safe Drinking Water Act authorizes the Environmental Protection Agency (EPA) to issue permits and require compliance with permit conditions. Under the Act, the EPA can issue orders or administrative penalties for failure to comply with permit conditions. To avoid this type of enforcement action, please take actions necessary to comply with all permit conditions.

Please contact me at 214-665-6459 if you have any questions.

Sincerely yours,

Ronald Van Wyk
